Supplementary Fig. 2. Standard images for MRI visual rating of temporal lobe atrophy. A: Standard no. 1: a representative image of diffuse temporal lobe atrophy (t-D type). B: Standard no. 2: a representative image of mild to moderate degree of focal temporal lobe atrophy (t-F1 type). C: Standard no. 3: a representative image of severe degree of focal temporal lobe atrophy (t-F2 type). t-D type: diffuse temporal atrophy type, t-F1 type: mild to moderate degree of focal temporal atrophy type, t-F2 type: severe degree of focal temporal atrophy type.
